RESOLVING REMOTE COMMUNICATION ISSUES
SOLAREDGE INVERTERS

# Reading an Inverter with no LCD Screen
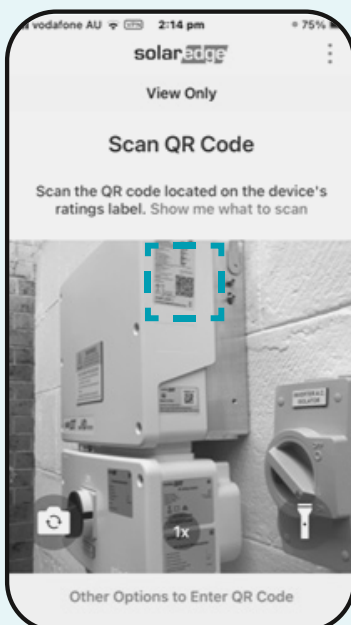

All Inverter Types

1 Download the SolarEdge Inverter SetApp from the App Store or Google Play Store.

2 Once the app is downloaded, open and press "view Only" at the bottom of your screen. No login is required.

3 You will be taken to a screen, which will open your camera. Hover your phone over the top QR code on the right hand side of the inverter - ensure the full code is visible on your screen.

4 The app will then prompt you to flick the toggle switch to "P". You will then be asked to "Join this network". Confirm and join the network.

5 Once connected you will see a status page with the site's live energy production shown.
